

GOGREEN PLUS: YOUR REAL BENEFIT FOR CLIMATE PROTECTION

The future belongs to companies that are actively committed to climate protection. With GoGreen Plus you achieve a **dramatic reduction of approx. 95% in CO₂e emissions** for shipments sent with Deutsche Post and DHL. This is good for **your carbon footprint** and **good for the environment in Germany**. Last but not least it will interest your customers.

THE BENEFITS FOR YOU

Low carbon shipping¹

- **Real reductions** of approx. 95% in shipping-related CO₂e emissions for domestic merchandise shipments – through investments in additional reduction measures, e.g. use of e-vehicles and biogas in the Deutsche Post and DHL logistics network in Germany (insetting).
- **Reduced CO₂e footprint:** CO₂e reductions credited towards the emissions of our GoGreen Plus customers²
- **Proven contribution to sustainable environmental protection:** Well above the standard for retroactive compensation (offsetting)

Reliability and transparency

- **External verification** of the methodology and concerted use of offsetting with reductions allocated to the GoGreen Plus customer by an independent, external auditor¹
- **Annual certificate:**² Official certification of the CO₂e emissions reduction and the used insetting measures
- **Monthly CO₂e Report:**² Statement of the customer-specific reduction effect in domestic merchandise shipments – including an itemized list of the different shipment products

Sustainable image

- **Attractive communications media and certificates** for promotional use: As a clear indication of your environmental protection commitment
- **In DHL shipment tracking and parcel notification:** GoGreen Plus visible to your recipients

Attractive pricing

- **For all products in domestic merchandise shipping:** DHL Paket (Parcel), DHL Retoure (Returns), DHL Kleinpaket (small parcels)
- **Attractive customer-specific pricing:** Please contact your sales representative

HASSLE-FREE ORDERING FOR YOU

Contractual activation is required. For new customers, this may be limited at times due to limited insetting capacities: contact your sales representative. **The service can be booked in various ways:**

BOOKING PROCESS	DESCRIPTION
Post & DHL BC-Portal	Simple booking process. GoGreen Plus logo automatically printed on the label
API	Interface alignment, where needed. Logo automatically printed on the label (depending on shipping system)
In-house programmers	Documentation & product specifications available in the Group API Developer Portal
External system	To enable the service booking, mention that you have a contract for GoGreen Plus

Flexible booking:

When your contract is activated, “Recurring booking” for all shipments of a given billing number is activated at first. You can then change it to “Booking for the single item” in the Post & DHL Business Customer Portal in the section “Booking Standards”.

¹ Insetting via “Voluntary Market Based Measures Framework for Logistics Emissions Accounting and Reporting” of the Smart Freight Centre.

² The decision whether and to what extent CO₂e reductions achieved through GoGreen Plus insetting measures can be counted towards your CO₂e footprint and thus the eco-balance, is the responsibility of the customer. The liability provisions are contained in the current service specification concerning the CO₂e Report, that is part of your contractual agreement pertaining to the transportation of parcels.
