*GoGreen Plus is a value-added service to a Deutsche Post and DHL shipment contributing to decarbonization measures within Deutsche Post and DHL's logistics network. By using alternative fuels and technologies, Deutsche Post and DHL reduces the usage of fossil fuels in the mode of transport and in buildings used for the GoGreen Plus shipment. This does not necessarily mean that the specific shipment is physically transported with vehicles or handled via facilities using these fuels or technologies. Further information, e.g. on concrete decarbonization measures, is available at www.GoGreenPlus.de.
